Product Catalog

ACTIVATED BLEACHING EARTH

Activated bleaching earth is a fine-grained, naturally occurring, high-adsorption, soil-like substance with the ability to adsorb impurities or colored substances from fats, or oils. Activated bleaching earth is widely used in the refining, decolorizing, and bleaching of edible oil and fats Bleaching Earth is world renowned for its consistency in quality, performance and efficiency in meeting even the most demanding refining requirements.

Product Details:

Application	Rice Bran Oil, Soya Bean Oil, Sunflower Oil, Palm Oil, Cotton Seed Oil, Castor Oil, Etc.
Physical State	Fine Powder
Moisture	2-5%
Bulk Density	0.65 gm/cc
Colour	Off White
Country of Origin	Made in India

Additional Information:

Delivery Time: Immediate
Packaging Details: 25 kg / 50 Kg Bag

FULLER'S EARTH

Fuller's earth is any clay material that has the capability to decolorize oil or other liquids without the use of harsh chemical treatment. Fuller's earth typically consists of palygorskite (attapulgite) or bentonite. It is also called Multani mitti. The use of Fuller's earth across the Indian subcontinent dates back to at least 1879. Fuller's earth has a substantial ability to adsorb impurities or colouring bodies from fats, grease, or oils.

Product Details:

Usage/Application	Refining & Decoloring of edible oils, petroleum products, etc.
Form	Powder
Grade	Technical / Industrial Grade
Packaging Type	HDPE Bags
Color	Off White
Country of Origin	Made in India

Additional Information:

Delivery Time: Immediate
Packaging Details: 25 kg / 50 Kg HDPE Bag
